OP ART= OPTICAL ART

TASK 1. READING AND UNDERSTANDING

What is Op Art?

Op Art, short for **OPTICAL ART**, is a style of visual **art** that uses **optical** illusions. **Op Art** works of art (obras de arte) **are** abstract, and mainly created in black and white.

Typically, they give the impression of movement, hidden images, flashing and vibrating patterns.

When does OP ART start?

Op art started in the 1960s

Who started Op Art?

It started with the Hungarian (húngaro) artist **VICTOR VASARELY**. **Bridget Riley**, and another artist called **Jesús Rafael Soto** were some of the most important op artists.

What are the characteristics of op art?

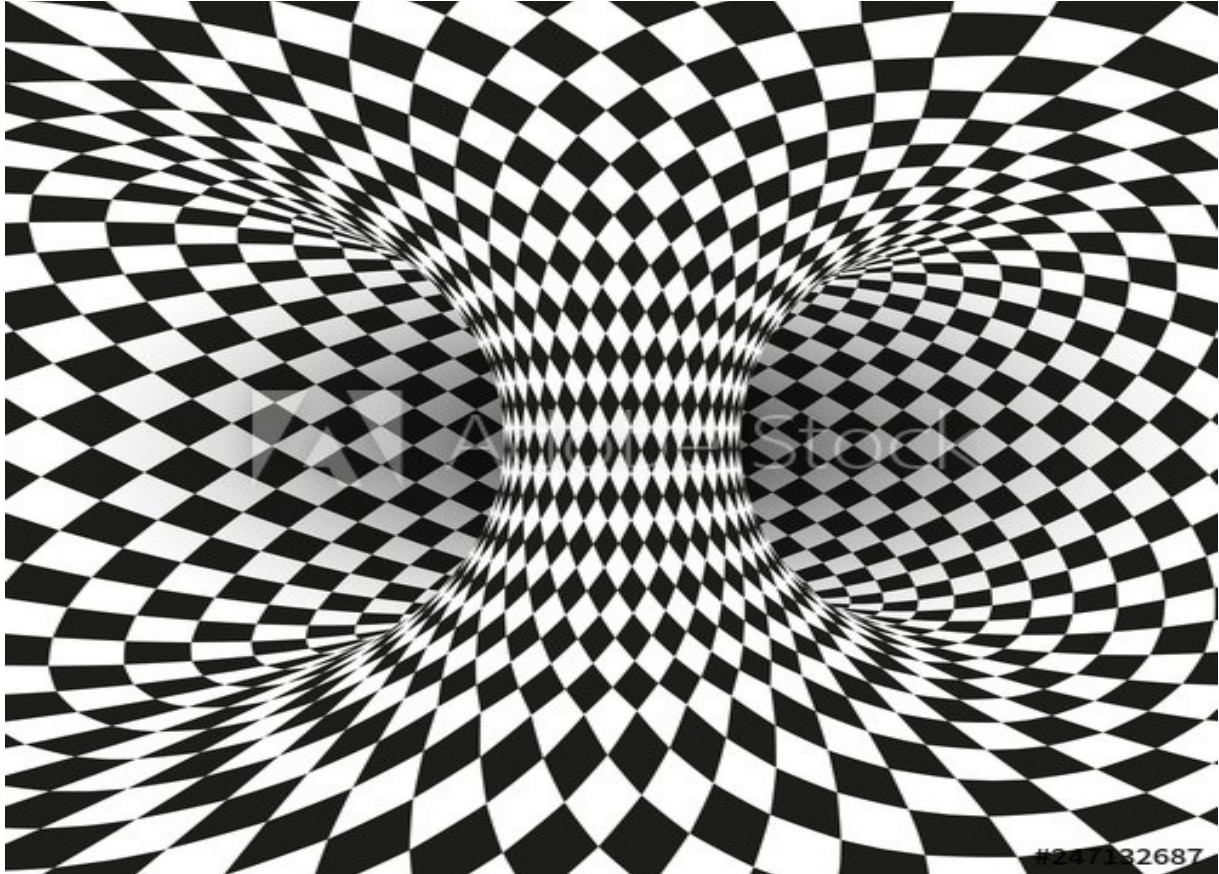

The most outstanding characteristics of op art are:

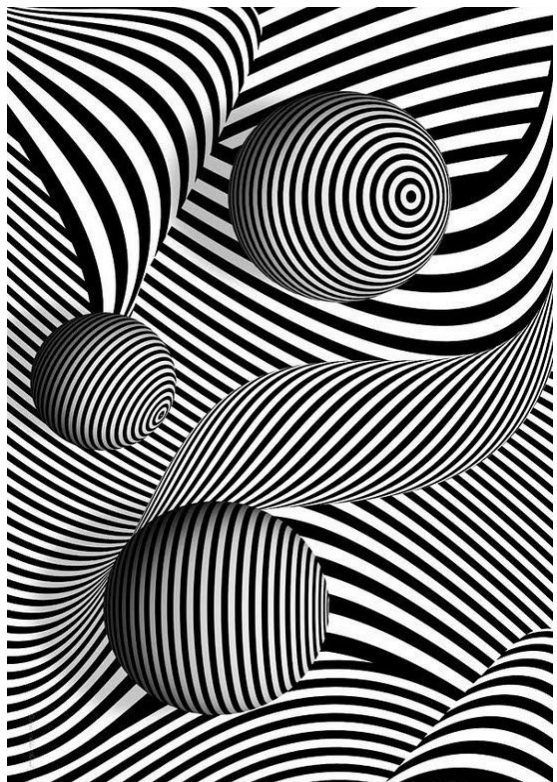

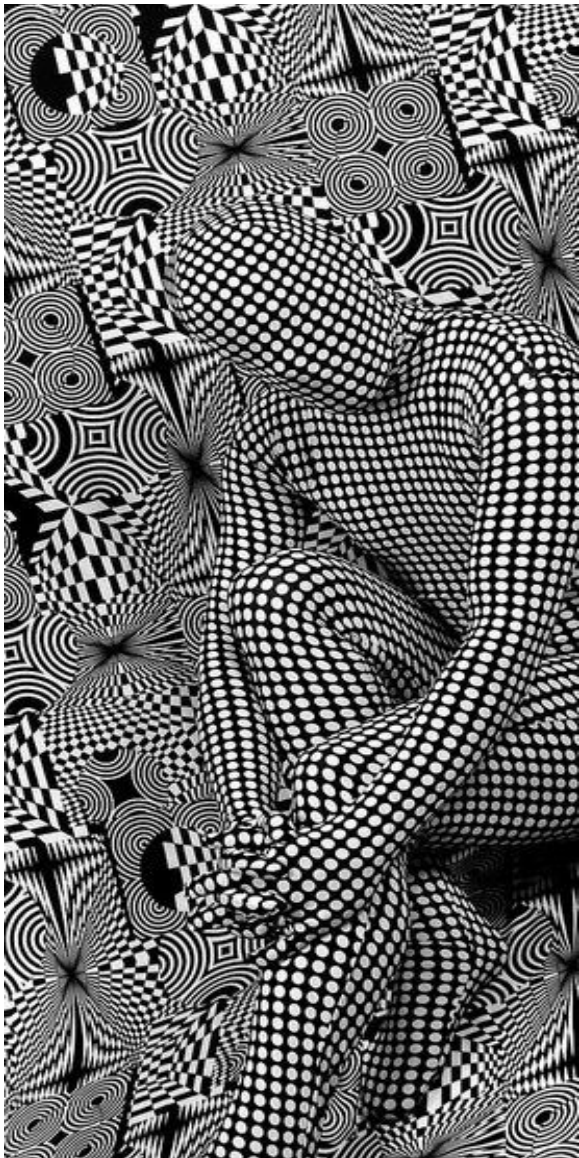

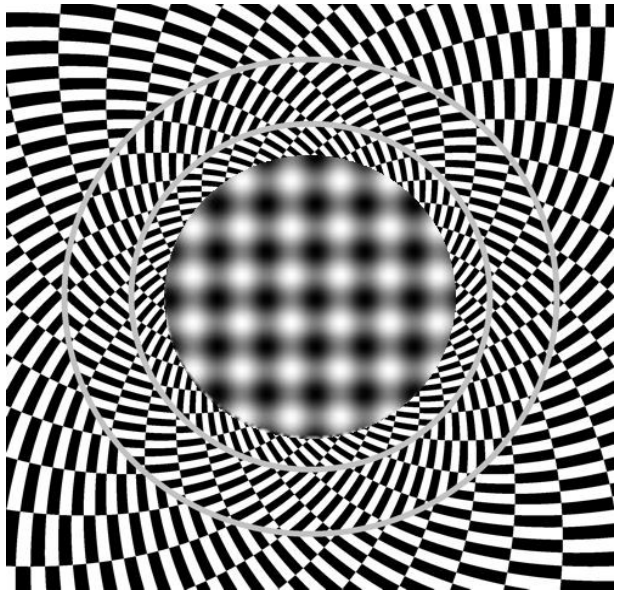

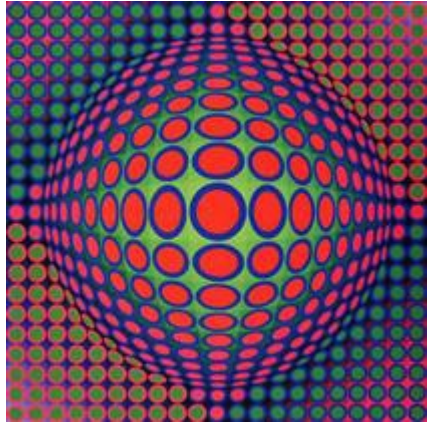

- It uses simple geometric figures that combined, form more complex figures.
- Its main objective is to give us visual effects that simulate that they have movement.
- It intends to fool the eye (intenta engañar nuestra visión de la obra de arte)

TASK 2. LOOK AT THESE OP ART WORKS OF ART

VICTOR VASARELY'S WORKS

TASK 3.

WATCH THIS VIDEO AND TRY TO DO THIS OP ART PROJECT

(Mira este vídeo e intenta dibujar con lápiz y rotuladores tu mano en 3-D) **NO REPASES LA SILUETA DE LA MANO CON ROTULADOR!**

<https://www.youtube.com/watch?v=oMgLiU-hWUo> (A 3-D HAND)

It's about how to draw a 3-D HAND. I think it is not difficult for you to do it in markers (felt-tip-pens). You can use the colours you want!

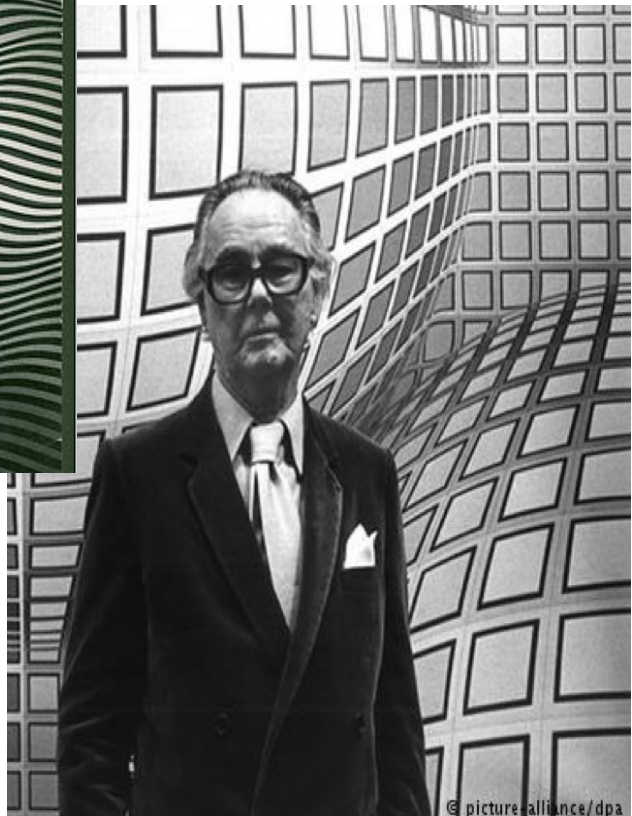

TASK 4:

WATCH THIS VIDEO AND DO THIS SPHERE IN BLACK AND WHITE. TRY IT!!

<https://www.youtube.com/watch?v=NZfj81PEn9o> (SPHERE) (If you don't have a compass at home you can use the bottom of a glass, or a any round object...)

When you finish these 2 activities, send them to my email:secochao@edu.xunta.es
