A meerkat is a small mammal that lives in the Kalahari Desert in Africa. It's got brown fur and very long claws. It's got big, black eyes and ears that can open and close. It's got a very long tail too. It uses its tail to balance and stand up on its back legs to look for dangerous animals.

Meerkats live together in big families. They don't live in trees, they live in holes in the ground called burrows.

They are very active in the day and sleep at night. Meerkats get up early every morning to look for food. Meerkats' favourite food is insects, but they also eat lizards, snakes, spiders, birds, plants, eggs and fruit. Meerkats help each other. When the meerkat family is eating, one meerkat will stand up and look for dangerous animals. Meerkats have babies in spring and summer because there is more food. When the babies are born they are pink and they haven't got fur. New babies can't see because their eyes are closed.

Meerkats can run very fast but they can't swim! They don't like water.

Hi Charlie!

I'm on holiday in Northumberland. It's in England. I'm having a really good time.

I'm staying in a town called Bamburgh. There's a newsagent's and there are some cafés but there isn't a cinema. There's a big castle. The castle is next to the beach. There are lots of rock pools at the beach.

i get up at 8:15 and i have breakfast at 9:00. I'm on holiday with my mum and dad. My mum has got glasses. She's got long, dark, straight hair. My dad hasn't got a moustache. He's got short, fair hair and a beard.

it's Friday today. We're going to visit a lake that's next to a forest. It's very beautiful. I can ride a horse and my dad can go fishing!

it's lunchtime now. My mum has got chicken and salad sandwiches, but I don't like chicken and I don't like salad. So I have strawberries and a smoothie for lunch every day!

i love holidays! What are you doing this holiday? See you soon.

Ton
