World Bank eAtlas

© 2011 Collins Bartholomew/The World Bank

World Bank eAtlas

- Práctica:
- Presentar en vista comparativa dous mapas por países que recollan o emprego infantil en agricultura e servizos.
- Mostrar en táboas o ranking de países con máis emprego infantil.
- Exportar os mapas en formato JPG e as táboas en formato Excel.

Using Geobrowsers for Thematic Mapping

The goal of this site is to investigate and show how geobrowsers can be used for thematic mapping.

A thematic map displays the spatial pattern of a social or physical phenomenon, such as population density, life expectancy or climate change. Thematic mapping has a long history in cartography, but the new geobrowsers tend to have a stronger focus on detailed satellite imagery and general-reference maps than on more abstract data sources.

Due to their huge public interest and relative accessibility, geobrowsers are potentially capable of bringing thematic maps or visualizations to a wider audience.

GéOclip

Intuitive and smart cartography

http://www.geoclip.net

Our offer

- Products
- Gallery
- Achievements
- Typical project
- Services

Getting started

- France découverte
- Paste your data
- Save your project
- Exchange: TJS/WMS

Features

- What is Géoclip?
- A smooth interface
- A wealth of information
- Multiple themes

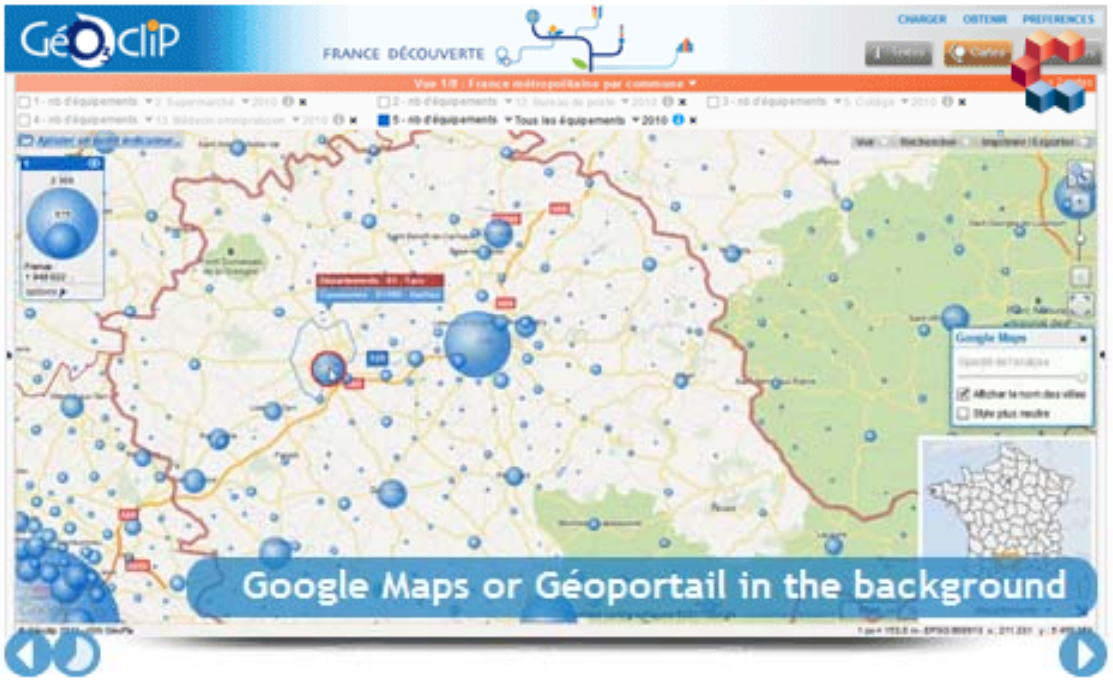
Resources

- Blog O3
- Sites and forums
- Referencing sites

Who are we?

- Our team
- Partners
- Customers

Blog O_3 : to learn everything there is to know about Géoclip



Explore the all new O3 France découverte!
The old version of France découverte is still available...

Geoclip O3 is very faithful to Geoclip fundamentals: *truly* interactive cartography, multiple and intuitive selection and navigation tools, thematic analysis, *"built according to best*

New faces of France
The statistical landscape is rich in numerous located data, from municipalities to regions. In this space, you can:
Display maps
>> ACCESS FULL LIST
Over a hundred maps on population, employment, housing, environment ... Examples in one click:
• urban areas typology 2010
• taux de chômage en moyenne trimestrielle au sens du BIT (Bureau international du travail)
• 1er tour - nuance regroupée en tête
Get reports
Target a geographic area, then expand your area of interest manually or using one of the many existing zoning layers. Then you can produce charts, exports, and dashboard of your territory.
Example : report on St-Germain-les-Belles county
Get data
Data from maps are available in tabular form, filterable at will. Exports of spreadsheet (xls) are also possible.

AtlasTUR

- AtlasTUR es el primer Altas Temático interactivo del turismo de España, y nace con el objetivo de convertirse en un portal de referencia para el sector turístico al constatar la diversificación de la información que existe en el sector, y la dificultad de acceder a dicha información de forma sencilla, proporcionando una visión diferente en forma de análisis geográfico de la información turística.
- AtlasTUR permite a través de un navegador y una conexión a internet de manera sencilla, acceder a los más de 107 mapas temáticos generados con información de diferentes fuentes como son entre otras, el portal spain.info de Turespaña, el Instituto Nacional de Estadística (INE), y en gran medida información estadística disponible en el Instituto de Estudios Turísticos (IET).
- AtlasTUR se engloba dentro de la serie de proyectos de la Red de Conocimiento del turismo de España, patrocinada por la Secretaría General de Turismo y Comercio Interior de España e INTELITUR, y está perfectamente alineado con el plan nacional de TURISMO HORIZONTE 2020.
- AtlasTUR está destinado a todos los actores relacionados con turismo y la innovación.
- A través del portal se ofrecen los siguientes servicios:
- 1. Acceso a más de 100 mapas temáticos
- 2. Búsqueda de municipios, provincias por el nombre
- 3. Imprimir el Mapa visualizado
- 4. Modificar la simbología del mapa y guardarla para posteriores cargas
