WHY DO WE PARTICIPATE IN ERASMUS?

- ❖ THE KA120-SCH PROJECT COMES TO OUR SCHOOL AT THE SAME TIME THAT MANY CHANGES ARE OCCURRING
- ❖ WE SUPPORT THE USE OF NEW TECHNOLOGIES BY EQUIPPING THE CLASSROOMS AND PARTICIPATING IN MANY PROJECTS SUCH AS: DIGITAL CLASSROOMS, ROBOTICS, CREATIVE POLES, THEATRE IN CLASSROOMS, SCHOOL RADIO AND TELEVISION
- ❖ IN THIS LEARNING CONTEXT, WE BELIEVE IN THE DEVELOPMENT OF STEM DISCIPLINES AND IN COOPERATIVE LEARNING TO PROMOTE ENTREPRENEURSHIP

WHY ARE WE INVOLVED IN ERASMUS?

- ❖ THE SCHOOL'S MANAGEMENT TEAM AND TEACHING STAFF ARE BEING INVOLVED IN THE USE OF NEW TECHNOLOGIES AND STEM DISCIPLINES IN ORDER TO DEVELOP ENTREPRENEURIAL PROJECTS THAT PLACE THE SCHOOL IN THE EDUCATIONAL REALITY OF THE 21ST CENTURY
- ❖ WE HAVE IDEAS, INTEREST AND GOOD WILL... BUT WE NEED HELP FROM THE CFR (RESOURCE AND TRAINING CENTRE) OF FERROL AND THE ERASMUS PROGRAMME TO START THIS ADVENTURE

1.-ATIOS TV

School television is a powerful tool to promote learning, as it combines audiovisual elements that capture students' attention and facilitate the understanding of complex concepts.

2.-RADIO ATIOS

School radio is also a powerful educational tool that encourages learning in a variety of ways. Although it does not have visual support, it has its own advantages that enhance the development of listening communication and social skills in students.

4. ROBOTICS

A school robotics workshop is an excellent educational tool that benefits students in multiple areas, from the development of logical thinking to strengthening collaboration and creativity skills.

<https://atiosobradoirorobotica.blogspot.com/>

5. SCIENCE CLUB

The “Science Club” is defined as a non-formal learning space based on an inquiry methodology where teachers suggest different actions focused on students so that they can respond to their curiosities, their interests and solve problems.

<https://blogueclubatiosciencia.blogspot.com/>

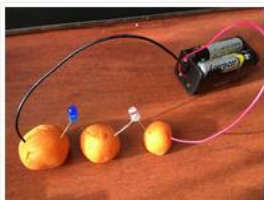

Clube de Ciencia

O CPI de Atios acaba de ser seleccionado entre outros 10 centros de Galicia, para participar no programa de innovación “Clube de Ciencia” Este Clube desenvolverase fóra do horario lectivo (martes pola tarde) e poderán participar alumnos de 2º e 6º de primaria e 1º da ESO que teñan interese en indagar na ciencia e responder as súas curiosidades mediante a experimentación. Profesoras encargadas : Ana Díaz, Laura A.Fernández, Reyes Montero, Ana Ramos e Cristina Soto.

6º Experimento .- Plastilina condutora, circuitos eléctricos

Materiais:

1. 100 ml farinfa
2. 100 ml auga
3. 2 culleradas de sal
4. 1 cullerada de aceite
5. Zume de 2 limóns
6. colorante alimentario

Preguntas:

- Por qué a plastilina conduce a electricidade?
- Todas as plastilinas son condutoras?
- Podemos entón montar circuitos eléctricos?

Hipótese:

Experimentación:

6º Experimento .- Plastilina

6.THEATER

Theatre is a multidisciplinary resource that can be used in different subjects in Primary and Secondary education with multiple benefits for students, such as teamwork or improved oral communication.

<https://www.edu.xunta.gal/centros/cpiatios/?q=node/1521>

7. “POLOS CREATIVOS”

CREATIVE POLES

Creative Poles are organised didactically to promote creativity and train students in a context of competency-based learning. They are based on the development of computational thinking and its associated competencies through active and manipulative learning, design-based learning, problem solving and peer learning. They will function as dynamic centres within the framework of the Digital Education Strategy 2030.

www.edu.xunta.gal/centros/cpiatios/?q=taxonomy/term/35

IN CONCLUSION:

- * A LEARNING OPPORTUNITY...
- * A REVIEWING/CHECKING OPPORTUNITY...
- * AN IMPROVING OPPORTUNITY...

BUT ABOVE ALL, FULLFILL A PERSONAL AND
PROFESSIONAL COMMITMENT

THANKS!!!!
